

## Case Study: Deductible Mitigation

# GOTTLIEB DELIVERS RESULTS.

### Problem

Deductible Mitigation Strategy resulted on average a decrease year over year of ~750 claims that would have been denied as deductible.

### Challenge

Insurance claims were proactively checked for an unmet deductible – claims for those patients with an unmet deductible were held for 60 days before release.

### Results

Those 750 claims were paid at the full insurance allowable, resulting in an increase of ~\$120k in collections.

Number of Claims with  
Deductible Denials
